SUMMARY

Backend-focused developer with hands-on experience across web, mobile, desktop and IoT. I've built and shipped production systems ranging from microservices fleet management platforms to government enterprise software — comfortable anywhere in the stack, from API design and database architecture to mobile apps and QA automation. I adapt quickly to new domains and new teams. Currently open to remote opportunities.

EXPERIENCE

[Eterno Global Technologies](#) — Full-stack Developer / QA Engineer (2025-Present)
Transitioned from a Full-stack contract to become the sole QA engineer, building the automation testing infrastructure from scratch for MINTEGRA — a microservices fleet management platform covering web, mobile, and IoT for mining operations across Kalimantan, Sulawesi, Java, and Sumatra. Currently automating 5 of 7 repositories using Playwright and Appium.

[Minergo Systems](#) — Full-stack Developer (2024-2025)
Worked as a full-stack developer on IRDC (Intelligent Remote Dispatch Control), a microservices fleet management platform for mining operations in Kalimantan, running on Docker and Kubernetes infrastructure. Built web interfaces with React and Express.js, and developed UAssist — a mobile app with Flutter and React Native — shipped to both Play Store and App Store. Also built a monthly production report cronjob service using Spring Boot.

[SAGE Solutions](#) — Full-stack Developer (2023-2024)
Developed multiple web products at a government-focused software house — including a full remake of BKAD's e-office system from CodeIgniter to Laravel (document management with PDF and e-sign), Pandu Digital, an event management platform for KOMINFO, and PINDAI, an HRIS with online attendance.

[Abhipraya Sumber Digital](#) — Intern Full-stack Developer (2022-2023)
Developed and maintained company profile websites and web catalogs using laravel and WordPress.

EDUCATION

[Open University Indonesia](#) (In progress)
Bachelor's degree in Information Systems

SKILLS

Languages : JavaScript, TypeScript, PHP, Dart, Go, Rust, C, SQL, Java, Groovy
Frontend : React, Next.js, Vue.js, Tailwind CSS, Bootstrap, Materialize CSS
Backend : Node.js, Express.js, Spring Boot, Laravel, CodeIgniter
Mobile : Flutter, React Native, Swift (SwiftUI), Ionic
DevOps : Docker, Kubernetes, Git, GitHub, GitLab, Vercel, Firebase
Testing : Playwright, Appium, Katalon, Kiwi TCMS, FireFlink, Qase
